

Nexora Digital — Enterprise Knowledge Base

Company overview: Nexora Digital provides enterprise technology consulting and managed AI services.

AI priorities: secure knowledge retrieval, proposal automation, customer support augmentation, and governance.

Security: confidential enterprise data should remain within approved systems and access should be controlled.

Governance: generated content requires human review for material business decisions and external publication.

2026 initiative: establish a reusable AI platform with retrieval, source traceability, editable Office artifacts, and validation.

Success measures: reduce document preparation time, improve knowledge discoverability, and maintain citation coverage.
